

Abdullah Ibna Mukta

Android & IOS Application Developer

From the beginning of my diploma I started to work on Android Studio and still now I am working on it. During my graduation I worked with CISCO real devices. Learn how to configure Switches and Routers and troubleshooting. Gain skill to work with team. Also learn about Mikrotik Routing. So I think to obtain a position that will allow me to utilize my technical skills, experience and willingness to learn in making an organization successful.
